

Alan Leszczuk

Front-End Developer

Date of birth: 04.12.1994,

ul. Brzoskwiniowa 4c/33, 50-539 Wrocław, Poland

(+48) 695 078 033

alan@leszczuk.com

My biggest strength is my ambition and determination to get the most knowledge possible. Furthermore, I am very creative and a perfectionist, which can be seen in my code.

EDUCATION

Collegium Da Vinci, Poznań – *Master's degree (not finished)*

2018 - 2019 Creative Management, major: User Experience

Wrocław University of Technology, Wrocław – *Bachelor's degree*

2013 - 2018 Faculty of Electronics, Control Engineering and Robotics, major: Information Technologies in Control System

EXPERIENCE

Infermedica, Wrocław – *Senior Front-End Developer*

04.2021 – present

- My responsibilities at Infermedica were improving existing products and developing new ones for patients, doctors, and nurses (health assessments, support tools, dashboards, etc.), collaborating closely with designers to build beautiful and usable interfaces, and making decisions on the architecture and technology of our apps. I was approving frontend code and deciding about product development and the direction in which it moves. I also partnered with other teams (Product, Backend, Medical, etc.) to create products our clients need.

At Infermedica we've been having a series of meetings called *Dev Frontend Talks* in which I've had the pleasure to present some talks. One of them was [the comparison of the Svelte and Vue3 frameworks](#), showing their pros and cons, similarities, and differences. The public repository can be found [here](#). Another one was [the comparison of the Playwright and Cypress e2e testing frameworks](#), and preparing POC of the proposed solution in one of our company's projects.

Technologies used: JavaScript, TypeScript, HTML(5), CSS(3), SCSS, Vue3, Pinia, Jest / Vitest, Playwright, Storybook, Vite, XState, Git, SCRUM, Mac OS/Unix, Atlassian Jira Software, Figma.

DEVINITI, Wrocław – *Front-End Developer, Senior Front-End Developer*

06.2018 – 03.2021

- For my first nine months in Deviniti, I've been working on a project for one of the largest banks in the world. The project was the generation of documents for corporate customer service. I was implementing the system using the latest technologies, such as Angular 6, Typescript, RxJS, Bootstrap 4 and Ngx-Bootstrap, HTML5, CSS3/SASS, Karma/Jasmine/Cucumber, and others related.
- After nine months, I transferred to Atlassian Apps, a department at Deviniti dedicated to Jira apps, where I've been developing Jira Cloud Applications using React/Redux library and the latest technologies such as React-hooks, Typescript, Styled Components, ExpressJS, Jest, Lodash, Webpack, and others related.

ANIXE, Wrocław – *Front-End Developer*

2017.08 – 2018.06

- During my work at ANIXE, I collaborated with back-end developers and web designers to improve the usability of the apps. Every project I was involved in was a web application based on technologies such as HTML5, Typescript, Angular 4/5, RxJS, Redux (NgRx), NodeJS, Gulp, Sass, Karma/Jasmine, etc.

Altimi Solutions, Wrocław – Intern, Junior Front-End Developer, Front-End Developer

2015.08 – 2017.07

- As the Front-End Developer in Altimi Solutions, I've been mainly working on two big projects for the Client of a Shipping Company and the Client of a Warehouse Management Company. The first one was a web application designed for shipment registration. We've been using AngularJS, Bootstrap, HTML5, Gulp, CSS3/LESS, and others related.
- The second project was a complex system to manage many warehouse logistics like picking up some packages or load boards, moving them to other warehouse lanes, choosing which items should be placed where, etc. We've used AureliaJS, HTML5/CSS3, Bootstrap, Sass, DevExtreme Grid, and many others.

PERSONAL SKILLS

JavaScript, TypeScript, ES6, HTML(5), CSS(3), LESS / SASS /
Vue3, Pinia, Jest / Vitest, Playwright, Storybook, Vite, XState,
Styled Components, Angular, AureliaJS, **Svelte**, Ionic, jQuery,
React, Redux, Jest, Lodash, Webpack, NodeJS, ExpressJS

Git, SCRUM, Linux/Unix, Atlassian Jira Software, Sketch/Figma,
English level B2, French level A1, Norwegian level A1

HOBBIES, PASSIONS

I am a bass player in a band called Siloe Rockers. I love many kinds of music - alternative, lo-fi, progressive, chillstep, classical, and indie. I do a lot of sports (bodybuilding and running). I love cooking and traveling with my wife, and I can't wait for our son to be a little bit older to do stuff with him. Last but not least - I'm in love with technology - broadly defined tech innovations but also precisely front-end innovations, the newest and hottest frameworks, and approaches.

I hereby agree for my personal data, included in my job application, to be processed in line with the needs of recruitment, in accordance with the Law on Personal Data Protection of 29 August 1997 (Law Gazette from 2002, No.101, heading 926, as amended).
